JIAYUN ZHANG

Email: jiayunzhang15@outlook.com ⋄ Homepage: https://jiayunz.github.io/

Room 806, Building 1, No. 1433 Cailun Road, Shanghai, 201203, P.R.China

EDUCATION

Fudan University   Shanghai, China
B.S. in Computer Science   Graduation: Jul 2020 (Expected)

University of Chicago   Chicago, IL, U.S.A
Research Intern co-advised by Prof. Ben Y. Zhao and Prof. Heather Zheng.   Jan 2020 - Mar 2020

Aalto University   Espoo, Finland
Research Intern advised by Prof. Yu Xiao.   Jun 2019 - Sep 2019

PUBLICATIONS

Fawkes: Protecting Personal Privacy against Unauthorized Deep Learning Models. [pdf]
*Shawn Shan, Emily Wenger, **Jiayun Zhang**, Huiying Li, Haitao Zheng, Ben Y. Zhao.*
arXiv preprint arXiv:2002.08327 (2020).

Understanding the Working Time of Developers in IT Companies in China and the United States.
***Jiayun Zhang**, Yang Chen, Qingyuan Gong, Aaron Yi Ding, Yu Xiao, Xin Wang, Pan Hui.*
Accepted by **IEEE Software**.

Detecting Malicious Accounts in Online Developer Communities Using Deep Learning. [pdf]
*Qingyuan Gong, **Jiayun Zhang**, Yang Chen, Qi Li, Yu Xiao, Xin Wang, Pan Hui.*
Proc. of the 28th ACM International Conference on Information and Knowledge Management (**CIKM'19**).

Identifying Structural Hole Spanners in Online Social Networks Using Machine Learning. [pdf]
*Qingyuan Gong, **Jiayun Zhang**, Xin Wang, Yang Chen.*
Proc. of the ACM SIGCOMM 2019 Conference Posters and Demos (**SIGCOMM Posters and Demos'19**).

DeepLoc: A Location Preference Prediction System for Online Lodging Platforms. [pdf]
*Yihan Ma, Hua Sun, Yang Chen, **Jiayun Zhang**, Yang Xu, Xin Wang, Pan Hui.*
Proc. of the 14th CCF Conference on Computer Supported Cooperative Work and Social Computing.

Understanding Work Rhythms in Software Development and Their Effects on Technical Performance.
***Jiayun Zhang**, Qingyuan Gong, Yang Chen, Yu Xiao, Xin Wang, Aaron Yi Ding.*
Submitted to International Conference on Mining Software Repositories (**MSR'20**).

A video dataset of a wooden box assembly process.
***Jiayun Zhang**, Petr Byvshev, Yu Xiao.*
Submitted to **Scientific Data Journal**.

RESEARCH EXPERIENCE

Security and Privacy on Deep Neural Networks   Jan 2020 – Present
co-advised by Prof. Ben Y. Zhao and Prof. Haitao Zheng, University of Chicago

○ **Defending Against Black-Box Adversarial Attacks on Deep Neural Networks** Feb 2020 – Present
- Implemented state-of-the-art black-box adversarial attacks including ZOO, Boundary and Parsimonious Attack; generated attack traces on four datasets: mnist, gtsrb, cifar-10, imagenet.

○ **Protecting Personal Privacy against Unauthorized Deep Learning Models**   Jan 2020 – Feb 2020
- Collaborated in building Fawkes, a system that allow individuals to inoculate themselves against unauthorized facial recognition models by adding imperceptible pixel-level changes to their photos.
- Evaluated Fawkes against state-of-the-art facial recognition services (Microsoft Azure Face API, Amazon Rekognition and Face++) and a variety of countermeasures (blurring, compression, data augmentation etc.).

User Behavior Analysis in Online Social Networks   May 2018 – Present
advised by Prof. Yang Chen, Fudan University

○ **Identifying Structural Hole Spanners in Online Social Networks**   Mar 2019 – Present
- Proposed a machine learning-based model for identifying structural hole spanners; leveraged the ego networks and the cross-site linking function to enhance the identification.

- Evaluated the model with Foursquare and Twitter datasets. Achieved a test F1-Score of 0.857.
- Contributed to a paper published in **SIGCOMM Posters and Demos'19**.

○ **Malicious User Identification in Version Control Systems**　　　　Jun 2018 – Jun 2019
- Collected a user-centric dataset including the information of over 10 million GitHub Users. [code][dataset]
- Analyzed the behaviors of legitimate users and malicious users on GitHub.
- Proposed GitSec, a deep learning-based system with Phased LSTM and attention mechanism to detect malicious accounts on VCS. Achieved a test F1-Score of 0.920 and an AUC value of 0.938 on the GitHub dataset.
- Contributed to a paper published in **CIKM'19**.

○ **Discovering Work Patterns of Developers**　　　　Jan 2019 – Sep 2019
- Performed clustering analysis on commit behaviors to identify representative work rhythms of developers.
- Analyzed the relationship between work rhythms and demographics, collaboration role and productivity.
- Conducted a user survey to understand the situation of working overtime from developers' perspectives.
- Contributed to a first-authored paper accepted by **IEEE Software**.

Data Mining on Health-Seeking Behavior　　　　May 2017 – Apr 2018
advised by Prof. Yun Xiong, Fudan University
- Devised a model with SVM for pneumonia detection based on medication records. A test accuracy of 0.915 was obtained on a real-world dataset collected from hospitals in Shanghai.
- Devised a prediction model with Time-Aware LSTM to predict one's stage of diabetes based on previous diagnoses. Achieved a test F1-Score of 0.787 on the real-world dataset.
- Developed a web-based interactive system for diabetes prediction.

INDUSTRIAL EXPERIENCE

VMware Information Technology (China) Co., Ltd.　　　　Shanghai, China
MTS (Member of Technical Staff) Intern　　　　Apr 2018 – Oct 2018
- Developed a log analysis system for automatically detecting the causes of program failures. 67 types of error causes was detected with an accuracy of 0.936 on real-time data from an internal bug reporting platform.
- Developed web APIs for an internal cloud resource platform to support the use of virtual machine templates.
- Participated in the implementation of Template Validation Service, a system for security verification of virtual machine templates uploaded to database.

SELECTED PROJECTS

Raindrop Removal From a Single Image, advised by Prof. Junping Zhang [code]　　　　Summer 2019
- Devised a deep-learning-based model for raindrop removal with ResNet, Dilated CNN and ConvLSTM.
- Incorporated Gaussian filtering in the model to remove the background interference.

3D Parkour Game [code]　　　　Winter 2017
- Developed a full-featured parkour game; built 3D game scenes in Unity, designed animation effects and user interactions; implemented the game logic with Unity Game scripts written in C#.

SELECTED AWARDS

2019 The First Prize of Shanghai Open Data Innovation Research Competition (Top 1 among 65 teams)
2019 Best Student Award, Mobile Systems and Networking Group at Fudan University (1 out of 32)
2019 Second Class Scholarship for Outstanding Students in Fudan University (Top 10%)
2019 Chun-Tsung Program (Research Endowment funded by Nobel Laureate Dr. Tsung-Dao Lee)
2018 Xiyuan Scholar (Undergraduate Research Program at Fudan University)

SKILLS

Programming: Python, C/C++, Ruby, C#, HTML/CSS, JavaScript, SQL.
Packages and Tools: Pytorch, Tensorflow, Scikit-learn, Matlab, Django, Bootstrap, Unity, Blender etc.
Standard Language Tests: TOEFL 104 (Reading 28, Listening 24, Speaking 24, Writing 28)
